

Biostratigraphic Chart - Gulf Basin, USA

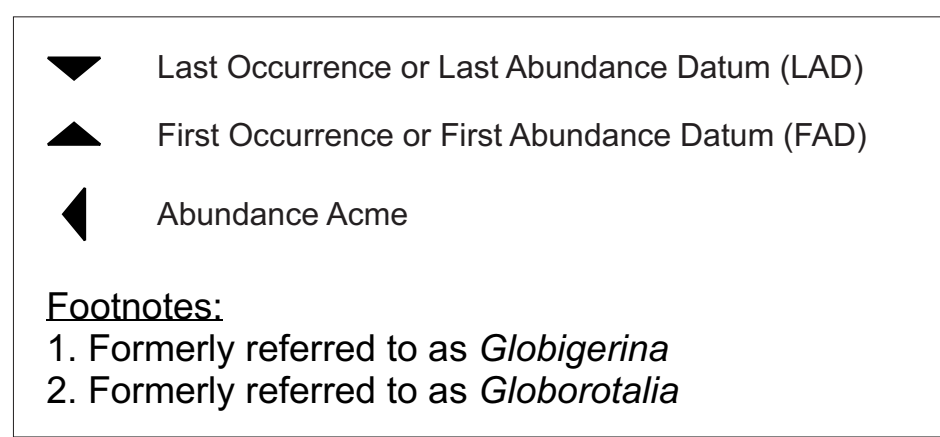

Paleogene

Ages for taxa in black are from Gradstein et al., 2004.

Taxa in red are calculated final iterative results at convergence based on GTS'04 ages and the Paleo-Data offshore Gulf of Mexico biostratigraphic database for the Gulf Basin.

Primary and Secondary Events are those having respectively higher and lower frequency of database occurrences and/or geographic extent.

Compiled by A.S. Waterman, M.W. Center, R.A. George, N.S. Vallette, A.F. Porter, Jr., T.M. Reilly, R.V. Roederer, J.S. Sarao, J. Schmieder, R.H. Filon
